

# CAVING AT SÖDERTÖRN

An unusual and exciting event. More than 10000 years ago these amazing caves were created. They combine a unique fauna with darkness, rocks and water. We crawl and climb the many paths in the cave. In the end everyone is rappelled to the main hall of the cave where inflatable- rafts lie ready and we paddle out of the cave. You will be provided protective clothing and safety equipment. Bring rugged shoes and clothes that you can easily move around in. The caves are on Södertörn (about 25 minutes SE from central Stockholm).
