

# RAPPELLING

Rappelling is a challenging task that requires a lot of trust and communication. With the use of climbing equipment, you will rappel down a high cliff. After careful instructions and under the strict supervision of our instructors, we build a security system, where participants assist by securing, guiding and motivating each other. Rappelling is a challenge with great impact. It provides both an adrenaline rush as an experience filled with confidence and pride. With professional instructors and with extreme security, we can offer rappelling in various locations.

## FACTS
