

THE GAME

This is our most exclusive arrangement with focus on teambuilding. Teamexercises, challenges and adventures are mixed into an activity that both gives a fun experience and a basis for teamwork discussions. The Game include exercises that illustrate different aspects of teamwork. The game is a competition with several teams, where the goal for the teams is to optimize their points. There will be a limit of points on the course, and to get the points the teams have to find different places, solve problems, find clues and do several missions. Each team receives a com-radio, and during the activity they will get information over the radio from the gameleader. After the activity the participants discuss the experience and give each other feedback, with help from the gameleader.
